# DISTILLING SYSTEMS

## Mash Equipment

Mashing is a key part of the distilling process converting the starches to fermentable sugars. We have several mashing systems to meet your requirements. Whether you will distill wort, a full mash (grain-in), or other starches, we have the quality equipment you need to get started.

Mash tuns with or without rakes and plow. Jacketed or non-jacketed options. Open top styles also available.

Filter presses from  
1BBL to 100BBL  
distilling systems

Sparge and  
transfer pumps

Malt mills  
and augers
