Crafting Possibilities.

# DISTILLING SYSTEMS

From 150L (40 Gallon) to 5000L (1320 Gallon)

We have all the equipment needed to go from grain to spirit. Our electrically heated bain-marie systems and steam fired systems are available in the following styles:

## COMPACT STILLS:

These stills are great for making a range of spirits with in the most space-efficient footprint.

## UNIVERSAL STILLS:

These stills offer the most versatility for making a full range of spirits.

With safety our number one concern, our distilling solutions include controls and control components designed and engineered for the Class 1 Division 2 surroundings that your inspector will look for.

We can customize and deliver everything designed and built to your requirements.
